

Suzlon awarded 226.8 MW order from leading IPP Company

- Installation of 108 units of S111 90 m tubular tower with rated capacity of 2.1 MW to be installed in Andhra Pradesh
- Project to power over 1,20,000 households and reduce 0.48 million tonnes of CO2 emissions per annum

Pune, India: Suzlon Group, one of the leading global renewable energy solutions provider in the world, today announced its order win of 226.8 MW wind power project from a leading Independent Power Producer (IPP). The order consists of 108 units of S111 90m tubular tower with rated capacity of 2.1 MW. The project will be located in Anantapur district of Andhra Pradesh, and is scheduled for completion by March 2017.

Suzlon has entered into an exclusive Supply and Installation Agreement (SIA) and Engineering and Construction of the project. Suzlon will also be responsible for operation and maintenance services with dedicated Life cycle asset management services for an initial period of 10 years. The project has the potential to provide power to over 1,20,000 households and reduce 0.48 million tonnes of CO2 emissions per annum.

J.P. Chalasani, Group CEO, Suzion Group said, "The order win is a testament of increased interest and investments from Independent Power Producers (IPPs) in the wind sector and we are confident that the demand from IPPs will continue to grow. We are working with most of the IPPs in India and they constitute ~80% of our current order book. This order also reiterates the customer confidence in our technology, product portfolio, execution and life cycle asset management capabilities."

Andhra Pradesh state government's focus on promoting non-conventional sources of energy has catapulted Andhra Pradesh as a forerunner in the development of renewable energy. The state's single window clearance has helped ease of doing business and boosted investments in the renewable sector.

The S11X 2.1 MW platform features the time tested Doubly Fed Induction Generator (DFIG) technology which is designed to optimally harness available wind resources. It not only delivers higher energy yield, but also offers higher return on investment for customers. The product is continuing to gain traction in the market.

About Suzion Group:

The Suzlon Group is one of the leading renewable energy solutions providers in the world with an international presence across 19 countries in Asia, Australia, Europe, Africa and North and South America. With over two decades of operational track record, the Group has a cumulative installation of approximately 15.5 GW of wind energy capacity, over 8,000 employees with diverse nationalities and world-class manufacturing facilities. Suzlon is the only Indian wind energy company with a large in-house Research and Development (R&D) set-up in Germany, the Netherlands, Denmark and India. Approximately 9.50 GW of the Group's installation is in India, which makes up for ~36% of the country's wind installations, making Suzlon the largest player in this sector. The company has recently forayed into the solar space. The Group, headquartered at Suzlon One Earth in Pune, India, is

comprised of Suzlon Energy Limited and its subsidiaries. For further information visit: <u>www.suzlon.com</u>
