

Suzlon secures 100.8 MW wind energy project

Suzlon has secured a 100.8 MW wind energy project from a leading global company. The company will execute the project with a scope of supply, supervision, and commissioning. Additionally, it will undertake post-commissioning operation and maintenance services. Suzlon will install 32 wind turbine generators with a hybrid lattice tubular tower and a rated capacity of 3.15 MW each, the company said.
